EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Thomas Donohue on September 28, 2006.

3. The application has been amended as follows:

Claim 17, line 10, replace "a first shaft engagement end configured to rotatably engage the hinge shaft" with -- a first shaft engagement end rotatably engaging the hinge shaft --.

Claim 17, lines 11-12, replace "a first shaft engagement upper surface configured to protrude beyond the hinge knuckle" with -- a first shaft engagement upper surface protruding beyond the hinge knuckle --.

Allowable Subject Matter

4. The following is an examiner's statement of reasons for allowance: The prior shows hinge guard assemblies comprising a first guard element having a first shaft engaging portion, a

first plate engagement portion, and a first transition body portion (Love, Welsh, Krohn).

However, the prior art fails to show all of the above elements further where the first shaft engagement end rotatably engages the hinge shaft and has an upper surface protruding beyond the hinge knuckle and positioned entirely between the hinge knuckle. Nor the prior art show each of the above elements in combination with a second guard element.
